

The Voice of the Editor-in-Chief

Dear Ladies and Gentlemen,
Colleagues,

We would like to present you the next issue of "Diabetologia Kliniczna", the issue that ends editorial year 2015, and at the same time the first issue, which appears in its entirety in English under the title CLINICAL DIABETOLOGY. This change is a result of systematic development of our journal aiming at further increasing its presence and importance on the international arena and striving to introduce "Clinical Diabetology" to the PubMed bibliographic base and ultimately to the list of scientific journals indexed in bibliographic databases, created by the ISI in Philadelphia termed as "Philadelphia list". English version of the journal will appear in an originally electronic form, in an open access mode. At the same time, however, I would like to assure you that until the moment of creation of the Polish version as a formally separate journal of

the Society, with its own ISSN number, in order to address the needs of our readers in the country, translations from individual issues of the original journal will be issued in parallel as translated supplements of the whole issues of "Clinical Diabetology".

Our efforts aiming at substantial strengthening of the journal have not gone unnoticed since from the beginning of 2016 "Clinical Diabetology" gained 10 points in the ranking of journals of the Ministry of Science and Higher Education. Here I would like to thank the Via Medica publishing house, Main Board of the Polish Diabetes Society and all members and supporters of the Society, whose actions supported the previous and current Editor-in-Chief in achieving this undoubted success in a tangible way.

Enjoy the lecture

Prof. Janusz Gumprecht, MD, PhD
Editor-in-Chief of „Clinical Diabetology“
