

Message from the Editors of the Polish Journal of Neurology & Neurosurgery to our Reviewers

The editors of *Neurologia i Neurochirurgia Polska* (Polish Journal of Neurology & Neurosurgery, PJNNS) are grateful to our reviewers for their assistance in the review process. We know that you have many other obligations and responsibilities. We very much appreciate the constructive feedback provided to the authors of submitted papers and to us. During our short tenure as editors of the PJNNS, we have had two publishers, *Elsevier* for the first year and *Via Medica* for the second; changing the reviewing electronic system has been a smooth process [1, 2]. Nevertheless, we apologise to our reviewers for inconveniences that this transition may have created for them.

The Journal is currently in an excellent position, with increasing numbers of submissions of very good clinical papers, and this has been reflected in our growing impact factor [3]. We have introduced several new features into the Journal, including Invited Editorials. Last month, *Via Medica* implemented a new functionality into our review process. The reviewers of our manuscripts can now suggest to us the need for an Invited Editorial, and can identify themselves as willing to write such a paper. This optional communication can be achieved electronically at the completion of the review process.

We are also open to further enlarging our pool of reviewers. If you have never reviewed for our Journal previously and would like to do so, please contact us, including your credentials and your particular areas of expertise. If you have reviewed for us in the past, please tell us if you would like to do so again.

We would also appreciate your input on how to further improve our Journal. Are there any new features which you think would enhance our readership and stimulate interest in potential authors? We can always be reached by e-mail and phone, or even in person during the congresses we attend.

The reviewers listed below provided their reviews between January 1, 2019 and December 31, 2019. Asterisks indicate those who provided three or more reviews.

Jarosław Sławek, M.D., Ph.D.
Co-Editor-in-Chief

Zbigniew K. Wszolek, M.D.
Co-Editor-in-Chief
