Virtual Health Library – Oncology

Dear Editor,

The Virtual Health Library – Oncology (VHL-O), is part of the regional project of Virtual Libraries coordinated by the Regional Library of Medicine of the Pan American Health Organization/World Health Organization (BIREME/PAHO/WHO).

The VHL-O is a decentralized and dynamic collection of information resources whose objective is the efficient and equitable access to the scientific knowledge in oncology. Operates as a catalogue of information resources, where its content is submitted to selection criteria and quality control for its integration.

We are pleased to inform you that the selection committee has considered that your journal *Nowotwory Journal of Oncology* is of high interest and quality level for the VHL-O users, for this reason we have included a link to it from our page:

<http://www.urucan.org.uy/iah/portalrevistas-k-z.htm>

Yours faithfully,

Lic. Dinorah González
