The internet web pages, also known as the web, are considered nowadays by doctors to be an exquisite source of knowledge. The number of pages concerning nuclear medicine is growing in logarithmical proportions. For instance, by entering “nuclear medicine” to the search engine named ‘Google’®, which is probably the best of the web browsers, over 637,000 accessible pages could be obtained.

WWW sites presented below contain only a part of the number of all www sites concerned with Nuclear Medicine.

The authors chose them because of their usefulness and their didactic and practical value.

Publishers/journals

Elsevier

<http://www3.us.elsevierhealth.com/Mosby/> — this site contains the pages of 3 nuclear medicine periodicals: Journal of Nuclear Cardiology, Seminars in Nuclear Medicine, Year Book of Nuclear Medicine
