

Dear Sirs and Madams,

I would like to announce the special supplement of "Nuclear Medicine Review" which consists of case reports only. Due to the changes made by management board, we can no longer print the case reports in previous form. Now the authors should adapt similar works to meet the requirements of clinical vignette which

can be published in regular issues. These changes are made to increase the scientific quality of our journal. I hope that above changes will not cause any inconvenience to you. This is the last chance to read the full case reports in our journal. I hope you will find it interesting.

Grzegorz Kamiński

Editor-in-Chief

Nuclear Medicine Review
