**Table S1.** Baseline characteristics, in-hospital outcomes of the patients with acute myocardial infarction

| <b>Baseline characteristics</b>                    | <b>n = 292 284</b> |
|--|--------------------|
| <b>Variable</b>                                    |                    |
| Age, years, mean (SD)                              | 68.1 (11.2)        |
| Male sex, n (%)                                    | 188 429 (64.5)     |
| Diabetes, n (%)                                    | 88 005 (30.1)      |
| Hyperlipidemia, n (%)                              | 49 147 (16.8)      |
| Atrial fibrillation, n (%)                         | 34 327 (11.7)      |
| Arterial hypertension, n (%)                       | 201 595 (69)       |
| Chronic coronary syndrome, n (%)                   | 123 724 (42.3)     |
| Previous coronary angiography, n (%)               | 58 409 (20)        |
| Previous stroke, n (%)                             | 9451 (3.2)         |
| Previous percutaneous coronary intervention, n (%) | 44 708 (15.3)      |
| Previous coronary artery bypass grafting, n (%)    | 3348 (1.1)         |
| Chronic kidney disease, n (%)                      | 19 927 (6.8)       |
| Dialysis, n (%)                                    | 3606 (1.2)         |
| Peripheral artery disease, n (%)                   | 2814 (1.0)         |
| Chronic obstructive pulmonary disease, n (%)       | 27 698 (9.5)       |
| <b>In-hospital treatment and outcomes</b>          | <b>n = 292 284</b> |
| Coronary angiography, n (%)                        | 268 581 (92)       |
| FFR assessment, n (%)                              | 10 717 (3.7)       |
| Percutaneous coronary intervention, n (%)          | 222 668 (76.2)     |

|  |               |
|--|---------------|
| IVUS, n (%)                                    | 15 879 (5.4)  |
| Coronary artery bypass grafting, n (%)         | 9914 (3.4)    |
| Blood transfusion, n (%)                       | 20 512 (7)    |
| Cardiogenic shock, n (%)                       | 7064 (2.4)    |
| Intensive care unit stay, n (%)                | 14 746 (5)    |
| All-cause death, n (%)                         | 25 666 (8.8)  |
| Medical therapy prescribed at discharge, n (%) |               |
| Dual antiplatelet therapy                      | 250 620 (94)  |
| Statins  | 239 956 (90)  |
| Beta blockers                                  | 194 631 (73)  |
| ACEI/ARB                                       | 210 628 (79)  |
| MRA  | 72 076 (24.6) |
| SGLT2 inhibitors                               | 25 851 (8.8)  |
| Loop diuretic                                  | 78 778 (26.9) |
| OAC  | 46 708 (16)   |
| DOAC   | 42 149 (14.4) |
| VKA  | 4559 (1.6)    |

Abbreviations: ACEI, angiotensin-converting enzyme inhibitors; ARB, angiotensin receptor blockers; DOAC, direct oral anticoagulants; FFR, fractional flow reserve; IVUS, intravascular ultrasonography; MRA, mineralocorticoid receptor antagonist; OAC, oral anticoagulants; SGLT2, sodium-glucose cotransporter-2; VKA, vitamin K antagonists

**Table S2.** 12-month data of the patients with acute myocardial infarction

| <b>12-month data</b>                                | <b>n = 292 284</b> |
|---|--------------------|
| Coronary angiography, n (%)                         | 61 814 (21.1)      |
| Percutaneous coronary intervention, n (%)           | 46 002 (15.7)      |
| Coronary artery bypass grafting, n (%)              | 6382 (2.2)         |
| Hospitalization due to cardiovascular reason, n (%) | 131 678 (45.1)     |
| Cardiac rehabilitation, n (%)                       | 89 035 (30.5)      |
| KOS-zawał, n (%)                                    | 58 936 (20.2)      |
| Myocardial infarction, n (%)                        | 16549 (5.7)        |
| Stroke, n (%)                                       | 3579 (1.2)         |
| All-cause death, n (%)                              | 52583 (18)         |
