Table S1 Protein C in patients with CAD, PAD, and CPAD analysed by one-way ANOVA test					
Source of variation	Sum of squares	DF	Mean square	F= ratio	Significance level
Between groups	35.1696	2	17.5848	3.952	p = 0.023
Within groups	333.7316	75	4.4498		
Total	368.9012	77	-		

ANOVA – analysis of variance, CAD – coronary artery disease, CPAD – coronary and peripheral artery disease, DF – degrees of freedom, PAD – peripheral artery disease
