Table S1. Main differences between HES and EGPA

	HES	EGPA
Blood eosinophilia	+	+
Tissue eosinophilia	+	+
Asthma	-	+
Ear/nose/throat involvement	-	+
Vasculitis	-	+
Löffler endocarditis	+	-
Intracardiac thrombi	++	+

EGPA- Eosinophilic Granulomatosis with Polyangiitis

HES- idiopathic Hypereosinophilic Syndrome

Videos: Large mural right ventricular thrombus is visible:

Video S1: Transthoracic echocardiography

Video S2: Transesophageal echocardiography

Video S3: Cardiac magnetic resonance

Video S4: Transthoracic echocardiography after 3 months- the thrombus is dissolved
