Table S1. Model performances of both full and reduced models

| | df | Likelihood ratio X^2 * | AIC | BIC | R ² | c-index |
|------------------|----|-----------------------------|-----|-----|----------------|---------|
| Full model | 19 | 101 | 806 | 882 | 0.180 | 0.723 |
| Reduced model | 9 | 95 | 860 | 913 | 0.157 | 0.716 |

*Likelihood ratio $X^2=0.78$, $p=0.981$

Abbreviations: AIC; Akaike information criteria, BIC; Bayesian information criteria
