Table S1. The sensitivity analysis testing the multivariable model adjusting for both clinical and echocardiographic parameters measured at 1-month

	HR	95% CI	P-value
Female gender	0.281	0.097–0.812	0.02
BMI, per 1 kg/m ² increase	0.64	0.757–0.985	0.03
Diabetes	7.660	2.563–22.888	<0.001
MI in history	0.323	0.107–0.980	0.046
PASP at 1-month follow-up, mm Hg	1.033	1.013–1.054	0.001
PPG, mm Hg	1.169	1.002–1.363	0.047
MPG, mm Hg	0.741	0.541–1.014	0.06

Abbreviations: BMI, body mass index; MI, myocardial infarction; MPG, mean pressure gradient; PASP, pulmonary artery systolic pressure; PPG, peak pressure gradient
