I would like to thank all members of *Advances in Clinical Nutrition* community who support the journal and treat it as a source of important scientific data. Our annual partnership with *Via Medica* allows the journal to maintain the highest editorial standards by leveraging an editorial platform that facilitates easy submissions and efficient review processes overseen by our experienced editors. I encourage all researchers interested in clinical nutrition and related issues to read the journal and publish their articles with us. I recommend reading the available publications, especially those written by Professor Brunon Szczygieł. Until the last days of his life, the Professor supported the development of the *Advances in Clinical Nutrition* as well as the development of clinical nutrition. He left a very important voice in the form of an article describing the history of clinical nutrition in Poland:

- https://journals.viamedica.pl/postepy_zywienia_klinicznego (Bruno Szczygieł "Historia leczenia żywieniowego w Polsce"/"History of clinical nutrition in Poland").

I would also like to emphasize the contribution to the development of a very important field of medicine, which is clinical nutrition and dietetics, and at the same time thank the current Editors of the journal *Advances in Clinical Nutrition*. In 2006, the first editor of the journal was prof. Marek Pertkiewicz, and then prof. Ireneusz Krasnodębski and Dr. Małgorzata Łyszkowska, who held this position until 2023.

We plan to activate POLSPEN members and researchers interested in nutrition and create an educational part of the journal, as well as special issues.

Recently published articles that I recommend to you:

- Małgorzata Łyszkowska, Grzegorz Kowalewski, Weronika Chacińska, Ryszard Sot, Hor Ismail, Piotr Kaliciński „Rola żywienia pozajelitowego na oddziale chirurgii dziecięcej” (Postępy Żywienia Klinicznego 2024; 19: 39–45, DOI: 10.5603/pżk.98146);
- Paweł Kutnik “Lesson learnt from COVID-19 pandemic. Analysis of nutritional aspect of critically ill patients treated in intensive care unit — single-center, retrospective study” (Postępy Żywienia Klinicznego 2024; 19: 26–31, DOI: 10.5603/pżk.99236).

Prof. Sylwia Małgorzewicz
Editor-in-Chief
